

# Telmap Install Guide

This is a guide detailing how to setup Telmap Navigator on a BlackBerry device.

1. In Applications select the 'Browser' icon as shown.
2. Browse to <http://telmapnavigator/download>

Please Note: a link maybe emailed to you. If this link is emailed to your BlackBerry then you can select the 'Get Link' option instead of this step.

3. Once the page has loaded select the 'Download' option

4. The download should take between 6 and 7 minutes depending on your coverage

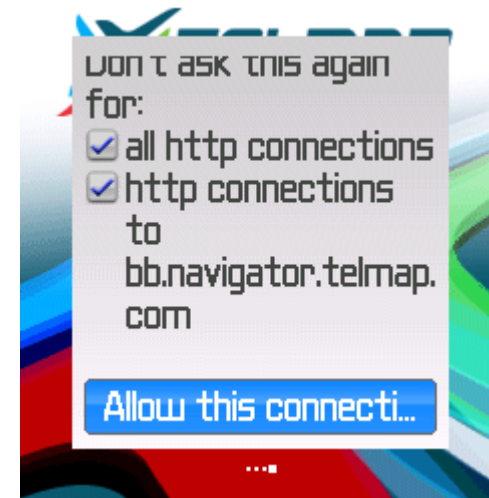

5. Please wait until you see that the application has been successfully installed.

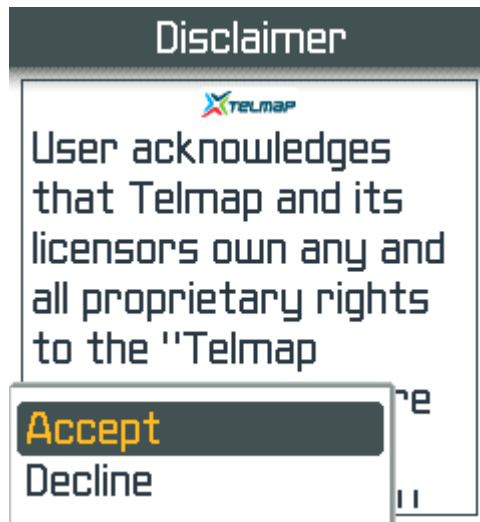

6. Select 'Run' to start the Telmap Navigator application.

7. You will be asked to allow a series connections between your device and the Telmap servers, please check the box which states 'Don't ask this again for'

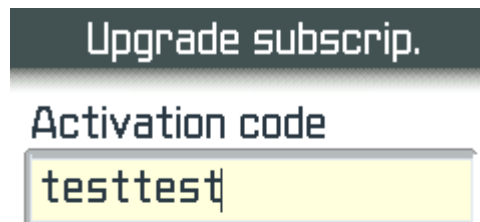

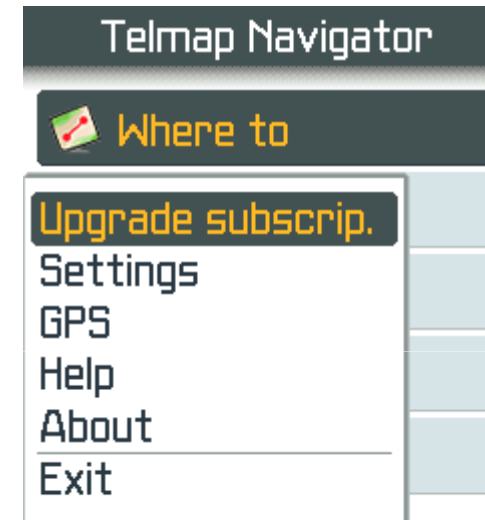

8. Now click Allow this connection.

9. Read and Accept the disclaimer by pressing the menu button to display the sub menu.

10. Press the menu button again to display the submenu shown on the right and select 'Upgrade Subscription'

11. Enter the licence key provided by Intercity Mobile Communications Ltd (not case sensitive) and select Upgrade Subscription/Register.

12. The software is now fully installed
